Building Product Information Sheet

Product name:

Pine Products NZ Radiata H3.2 Merch Shiplap Fence Paling

Product description and its intended use:

Pine Products NZ Radiata H3.2 Merch Shiplap Fence Paling

Intended use: Timber fencing

Available Sizes: 140 x 19mm x 1.8m

Product Identifiers in order above: SHP1502518

Species RADIATA PINE
Grade Merch
Treatment H3.2

Features

Place of manufacture: Aotearoa New Zealand

Legal and trading name of the manufacturer(s):

Pine Products Limited

Address for service:

896 Halswell Junction Road, Hornby South
Christchurch, New Zealand 8042

Website: www.pineproducts.co.nz

Relevant Building Code clauses:

Fencing Act

Statement on how the building product is expected to contribute to compliance:

N/A

Limitations on the use of the building product:

This product is limited to use in application of fencing and other structures not required to be water tight. This product is not to be used as a cladding alternative.
H3.2 Not to be used in contact with ground.

Design requirements that would support the use of the building product:

Exempt from building consent:

Any building work relating to fences (which includes garden walls) and hoardings up to 2.5 metres high is covered by this exemption and will not need a building consent. Fences to swimming pools are outside the scope of this exemption and will require building consent.**Hoardings are often put up around building construction sites and are only there temporarily to ensure public safety during the construction phase.**To check the height of your fence or hoarding against the 2.5 metre limit for this exemption, measure the vertical distance between the top of the structure and the supporting ground directly below.**Note that you will still need to comply with the requirements of the Fencing Act 1978 for boundary fences. In many cases, district plans made under the Resource Management Act 1991 may also require you to obtain a resource consent for fences over a certain height (usually over 2 metres)

The following work requires building consent:

A building owner proposes to erect a 3.5 metre high wire mesh fence around their tennis court, well clear of any boundaries. As the fence height is greater than 2.5 metres, a building consent is required.**An owner wants to build a new timber fence with an overall height of 3 metres along the rear boundary of their property. As the fence height is greater than 2.5 metres, they will need to obtain a building consent.**The owner of a residential dwelling intends to extend a 2.8 metre high concrete block wall alongside a neighbouring boundary. As the fence height is greater than 2.5 metres, a building consent is required.**A building owner proposes to erect a new 1.2 metre high fence around a swimming pool. A building consent is required and the fence installed before the pool is filled with water. Regular three-yearly inspections will be required from the date of the code compliance certificate

Installation requirements:

N/A

Maintenance requirements:

N/A

Is the building product/building product line subject to warning or ban under section 26?:

No

If yes, description of the warning or ban under section 26:

N/A
